S VOLUME 44 book.

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 232 pages. Dimensions: 9.7in. x 7.4in. x 0.5in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1887 edition. Excerpt: . . . circuits which the present needs of business and communication 25 require. In other words, I provide for the running in close proximity of circuits for carrying the strongest and most intense currents, as well as those for carrying the most feeble electrical impulses--such as are produced in the operations of telephony--and this in such manner there will be no danger to any circuit from such proximity, while all are brought within ready and easy access. The system comprises main and branch pipes or 35 conduits, in which the conductors are carried in the manner hereinafter specified. The mains consist of three separate and independent pipe-lines, one containing such wires as are required for communication with distant 40 points or other cities, and which will be hereinafter designated as trunk-lines. Another pipe contains the wires of circuits used in local communication and intercommunications--such as telephone-lines, fire and burglar 45 alarm circuits, and the like--while the third contains the circuits used for electric lighting, transmission of power, or those industrial and domestic applications of electricity which require powerful currents. The lines are run 50 through the streets of a city at such a distance below the surface as will insure protection against bending or injuries from repair of the streets, subsidence of the surface soil, and the like. Generally and whenever convenient the lines are run midway between the buildings on 55 either side of the way, and with the trunkline between the other two. At the...
