The pages are clean, crisp, unmarked and uncreased. Due to the size and weight of this of book, additional postage may be required for priority or international shipments. We package all books in custom cardboard book boxes for shipment and ship daily with tracking numbers.; "Leading researchers and clinicians join forces to explain how malignant melanoma develops from its benign precursor cell type. The authors focus on the molecular mechanisms involved in melanogenesis, in the malignant transformation of melanocytes, and in the further progression of primary melanomas into invasive and metastatic melanomas. They also review recent advances in our understanding of the basic biology of melanocytes and the development, migration, and differentiation of melanoblasts into melanocytes. The book provides an up-to-date understanding of the progressive mechanisms of oncological development in malignant melanoma, a likely model of malignant progress for other types of cancer, and the ongoing development of novel therapeutics."; 10.16 X 7.32 X 1.57 inches; 696 pages.
