

Lessons in Physical Geography

By Charles Redway Dryer

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1901 Excerpt: . divide the beds into large rectangular blocks, giving them the appearance of courses of cyclopean masonry. These joints determine the planes along which the rocks split easily, so that the face of a cliff may be vertical or overhanging, according to the angle of jointing. The loftiest and most precipitous slopes occur in rocks which are practically free from joints, as in the 3300-foot granite face of El Capitan in the Yosemite Valley. In the course of weathering small local differences in the quantity of cement in a rock are etched out into curious patterns of fretwork, as shown in Fig. 211. There is one law of universal application to sculptured surfaces, --the lardFig. 211.-E1 capitan. est survives. The Fig. an.--Jointed rocks and differential weathering. level surface of a denuded plateau or mesa is generally the top of a hard bed, from which softer beds...
